WORLD DEVELOPMENT REPORT 2016 Internet for Development

World Bank Group

Jan 2016 264pp

9781464806711 Paperback £25.95 / €36.00

9781464807282 Hardback £44.50 / €61.00

The internet has spread rapidly. Development has not. But there are instances where technology can be transformational. A digital identification system such as India's Aadhar overcomes complex information problems to promote the inclusion of disadvantaged groups. Alibaba's business-to-business e-commerce platform reduces coordination costs to boost efficiency in China's economy. The M-Pesa digital payment platform exploits scale economies from automation to bring innovations to Kenya's economy. The full transformative potential of the internet, however, remains largely unrealized in most developing countries. The *World Development Report 2016* explores why. It analyses the internet's impact on economic growth, on social and economic opportunity, and on the efficiency of public service delivery. It explores the factors that have allowed some businesses, people, and governments to benefit greatly from the internet – and others not.

For the internet to have greater impact everywhere and on everyone requires simultaneous investment in technology and its complements. The unfinished task of making the internet universally accessible and affordable remains an urgent policy priority. It also requires improving the "analogue" complements to digital investments – by strengthening regulations that ensure competition among businesses, by adapting workers' skills to the demands of the new economy, and by ensuring that institutions are accountable. These measures involve policy reforms in the information and communication technology sector, in complementary sectors at the national level, and strengthening cooperation on the governance and use of the internet at global level.

GLOBAL MONITORING REPORT 2015/2016

Development Goals in an Era of Demographic Change

World Bank Group & International Monetary Fund

Oct 2015 240pp

9781464806698 Paperback £25.95 / €36.00

The *Global Monitoring Report 2015/2016*, produced by the World Bank Group in partnership with the International Monetary Fund, comes at an inflection point in both the setting of global development goals and the demographic trends affecting those goals.

This year marks the end of the Millennium Development Goals (MDGs) and the launching of the Sustainable Development Goals (SDGs), while the World Bank Group has in parallel articulated the twin goals of sustainably ending extreme poverty and sharing prosperity. This report presents the latest global poverty numbers, based on the 2011 purchasing power parity (PPP) data, and examines the pace of development progress through the lens of the evolving global development goals.

The special theme of this year's report examines the complex interaction between demographic change and development. With the number of children approaching a global ceiling of two billion, the world's population is growing slower. It is also aging faster, with the share of people of working age starting a decline in 2013. But the direction and pace of these trends vary starkly across countries, with sizeable demographic disparities between centres of global poverty (marked by high fertility) and drivers of global growth (marked by rapid aging). These demographic disparities are expected to deeply affect the pursuit of the post-2015 agenda, accentuating existing challenges and creating new opportunities.

DOING BUSINESS 2016 Measuring Regulatory Quality and Efficiency

World Bank Group

Oct 2015 300pp

9781464806674 Paperback £25.95 / €36.00

The thirteenth in a series of annual reports comparing business regulation in 189 economies. This year the report addresses regulations affecting 11 areas of everyday business activity, including starting a business, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts, resolving insolvency and labour market regulations.

Doing Business 2016 updates all indicators as of June 1, 2015, ranks economies on their overall ease of doing business, and analyses reforms to business regulation – identifying which economies are strengthening their business environment the most. This report illustrates how reforms in business regulations are being used to analyse economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 60 economies have used the *Doing Business* indicators to shape reform agendas and monitor improvements on the ground. In addition, the *Doing Business* data has generated over 2,000 articles in peer-reviewed academic journals since its inception.

This year's annual *State of Food Insecurity in the World* report takes stock of progress made towards achieving the internationally established Millennium Development Goal (MDG1) and World Food Summit hunger targets and reflects on what needs to be done, as we transition to the new post-2015 Sustainable Development Agenda. The report reviews progress made since 1990 for every country and region as well as for the world as a whole.

Overall progress notwithstanding, much work remains to be done to eradicate hunger and achieve food security across all its dimensions. The 2015 report not only estimates the progress already achieved, but also identifies remaining problems, and provides guidance on which policies should be emphasized in the future. Key factors that have determined success to date towards food security and nutrition goals are identified. The list of factors – economic growth, agricultural productivity growth, markets (including international trade) and social protection – is by no means exhaustive. The report also shows protracted crises, due to conflict or natural disasters, has deleterious effects on progress in hunger reduction.

WORLD ECONOMIC OUTLOOK, OCTOBER 2015 Adjusting to Lower Commodity Prices

IMF Staff

Nov 2015 277pp

9781513520735 Paperback £50.50 / €69.00

World Economic and Financial Surveys

The *World Economic Outlook (WEO)*, published twice yearly, presents the IMF staff's analysis of prospects for the global economy, major country groups (classified by region and stage of economic development), and many individual countries. Each issue reports on developments in global financial markets, economic governance, and critical policy issues. The *WEO* tracks key indicators such as output, growth, inflation, employment, government debt, current account balances, savings, and financial flows. The data are presented in easy-to-read maps, charts, and tables. Each issue also includes two analytical chapters that delve into topics of critical policy relevance.

This issue of the *World Economic Outlook* discusses a number of factors affecting global growth, as well as growth prospects across the world's main countries and regions. It assesses the ongoing recovery from the global financial crisis in advanced and emerging market economies and evaluates risks, both upside and downside, including those associated with commodity prices, currency fluctuations, and financial market volatility. A special feature examines in detail causes and implications of the recent commodity price downturn; analytical chapters look at the effects of commodity windfalls on potential output and of exchange rate movements on trade.
